

About This Resource

The information in this leaflet is an overview of the top safety and privacy tips used by sex workers who use digital technology, including phones, apps, laptops, online forums etc., to run their business.

We use the term *online sex workers* and this includes escorts, pro doms, pro subs, agency workers and cammers. It can also be useful for workers in any area of the sex industry where technology plays a part in your working life.

We hope you find it useful.

BEYOND
THE
GAZE

About Beyond the Gaze

Beyond the Gaze was a three year study, the largest in the UK to date of online sex work, exploring the safety and working practices of online sex workers. To leave a practical resource informed by the research, the team at Beyond the Gaze have produced *Safety and Privacy for Online Sex Workers*. This is a downloadable resource full of safety and privacy tips, from sex workers themselves - to help keep sex workers safe. This leaflet is an extract from the full document, which can be downloaded from:

www.beyond-the-gaze.com.

The full document is also available from our partners, National Ugly Mugs:

www.uglymugs.org
